The HiBoost Large Home Smart Link kit is a cell signal booster system is designed for large homes, metal buildings, and small offices that need improved cell signal reception. This system improves both voice and data quality to reduce dropped calls and missed messages, keeping your family members, friends, and guests connected with a stronger cell signal.

Monitor your Smart Link system from your smartphone

HiBoost's Signal Supervisor app for smartphones helps you set up and monitor your cell signal booster. The booster links to your iPhone or Android via a Bluetooth or WiFi connection. With Signal Supervisor, you can:

- Register your booster via a QR Code or Bluetooth.
- Monitor your signal booster's status via Bluetooth.
- Set up and receive remote alerts if your booster is not operating properly.
- View your booster's power settings, decibel gain, and dBm output.
- Manage multiple boosters.
- HiBoost's Signal Supervisor app is available for Apple iOS and Android devices.

Who is this system for?

- Homes with weak cell service
- Small offices where multiple employees use a variety of cellular carriers
- Metal buildings that need improved inside coverage.
